Cognitive integration is an overlooked yet defining feature of our intellect. It is the reason why, in contrast to mere stimulus response automata, we entertain advanced beliefs in an epistemically responsible way, and why we can do so even in the complete absence of any reasons to back those beliefs up.

While we have learned much about human behavior and neurobiology, there is arguably no field that studies the mind itself. We want to overcome the fragmentation of the cognitive sciences. We aim to create models and concepts that bridge between methodologies, and can support theory-driven research.

Cognitive Search is powered by Azure Search with built-in Cognitive Services. It pulls data from a variety of Azure data sources and applies a set of composable cognitive skills which extract knowledge. This knowledge is then organized and stored in a search index enabling new experiences for exploring the data.

Cognition - Wikipedia

In psychology, the term "cognition" is usually used within an information processing view of an individual's psychological functions (see cognitivism), and it is the same in cognitive engineering; in a branch of social psychology called social cognition, the term is used to explain attitudes, attribution, and group dynamics.

Cognitive behavioral therapy - Wikipedia

Cognitive behavioral therapy (CBT) is a psycho-social intervention that aims to improve mental health. CBT focuses on challenging and changing unhelpful cognitive distortions (e.g. thoughts, beliefs, and attitudes) and

behaviors, improving emotional regulation, and the development of personal coping strategies that target solving current problems.
