A public-private partnership, or P3, is a contract between a governmental body and a private entity, with the goal of providing some public benefit, either an asset or a service. Public-private partnerships typically are long-term and involve large corporations on the private side. A key element of these contracts is that the private party must take on a significant portion of the risk because

ensuring that Public-Private Partnerships are met by strong public institutions, are affordable, form part of an integrated public-sector infrastructure investment and procurement framework. Active consultation and engagement with stakeholders should be an integral element of the process. PPPs may be used to introduce a more private-sector approach to service delivery in sectors that have

[Public-Private Partnerships Overview - worldbank.org](#)

Public-private partnerships (PPPs) can be a tool to meet these needs for infrastructure services. When designed well and implemented in a balanced regulatory environment, PPPs can bring greater efficiency and sustainability to the provision of public services such as water, sanitation, energy, transport, telecommunications, healthcare, and education. PPPs can also allow for better
