The first deals with the manner of representation of sensory information in peripheral nerves: the so-called first order code. The second half of the text deals with the handling of sense data by the central nervous system. One reason for dividing the material in this way is that many of the features of the first-order code are common to all sensory modalities. The intensity, the place, the

Sensory nervous system - Wikipedia

The sensory nervous system is a part of the nervous system
responsible for processing sensory information. A sensory
system consists of sensory neurons (including the sensory
receptor cells), neural pathways , and parts of the brain
involved in sensory perception .
