Momentum of a stationary particle/wave? | Physics Forums

Physicswise this means to get an approximately stationary state for a free particle the standard deviation of momentum should be very small, implying through Heisenberg's uncertainty relation that the standard deviation of position must be very wide.

UMRR Traffic Sensor Type 29 Data Sheet I Page 1 of 24 I November 27, 2018 www.smartmicro.de . Stationary reflectors are not reported. Stopped objects are reported, as they remain valid in the tracking data base until they start moving again, for example at a stop bar. The field of view typically covers up to four lanes. PROPRIETARY The information contained in this document may be subject Stationary states and time-dependent states

The Hamiltonian  $H$  of a stationary-state system contains no time-dependent terms. So the result of calculating the energy of such a system is the same whether or not the time factor is included. (Show that the same is true in the calculation of  $\langle \dots \rangle$  and of also.)
